Library Statistics

Fiscal Year 1987-1988

A statutory requirement of the New Mexico State Library is the collection and reporting of data from all libraries in the state. The statistics in this document were obtained from the 1987-88 annual reports received from, public, community, academic, special and institutional libraries. In addition, State Library program statistics are included.

Thanks go to the librarians who took the time to complete the reports and to submit comments.

When interpreting the data in this report for public and community libraries, it should be noted that population figures were obtained from the 1980 Census of Population, and those figures are the basis for all per capita elements reported.
